Dear Mr. Hedberg:

Enclosed is a copy of a Plan of Operation submitted by Elton Stout for ongoing exploration (UT-047-91-16P) in T. 43 S., R. 15 W., sec. 7. A plan is required for this operation because it is located in an area closed to off-road vehicle use due to the dwarf bear claw poppy. Any comments on this plan or input into the EA should be made by August 23, 1991.

If you have any questions or comments relating to the EA, please contact Larry Gore at this office.

Sincerely,

Dale Ross
Acting Area Manager

East Price 11	128026 PL	Placer

Upon information and belief, a portion of the above-described real property has been conveyed to the State of Utah and is administered by that State. All, or a portion of East Price 00, East Price 01, East Price 02, East Price 03, and East Price 04 are still located in land administered principally by the BLM.

Proposed Operations: Claimants propose to perform their annual assessment work on the above-mentioned mining claims through core drilling operations undertaken for the purpose of locating and evaluating gypsum deposits in East Price Nos. 01 and 02. Claimants will access the site of operations through the use of the existing dirt road which originates on Brigham Road in St. George, Utah, just west of the Utah State Department of Transportation road shed and travels in a southerly direction to an electrical substation. No new areas will be disturbed and it is not anticipated that any

of the proposed operations will disturb any lifeforms, vegetable or animal, including the bear claw poppy. The claimants do not propose to pave or otherwise burden the area with any road base or other substance foreign to the subject land.

Date of Operations are Proposed to Commence as Outlined in this Submittal: August 15, 1991.

Legal Description and Map:

See attached Exhibit "A".

Access Routes (Existing and Proposed): The existing access route is a dirt road from Brigham Road to a power line and substation located in the proximity of the line dividing Sections 7 and 18, Township 43 South, Range 15 West, SLB&M.

Existing Disturbance and Structures: There are currently roads traversing Section 7, 18 and 19, Township 43 South, Range 15 West, as well as some excavation and stockpiling in Sections 18 and 19, Township 43 South, Range 15 West and Section 24, Township 43 South, Range 16 West SLB&M.

Proposed Operations: Future assessment work will concentrate mainly on core drilling for the purpose of locating and evaluating gypsum deposits.

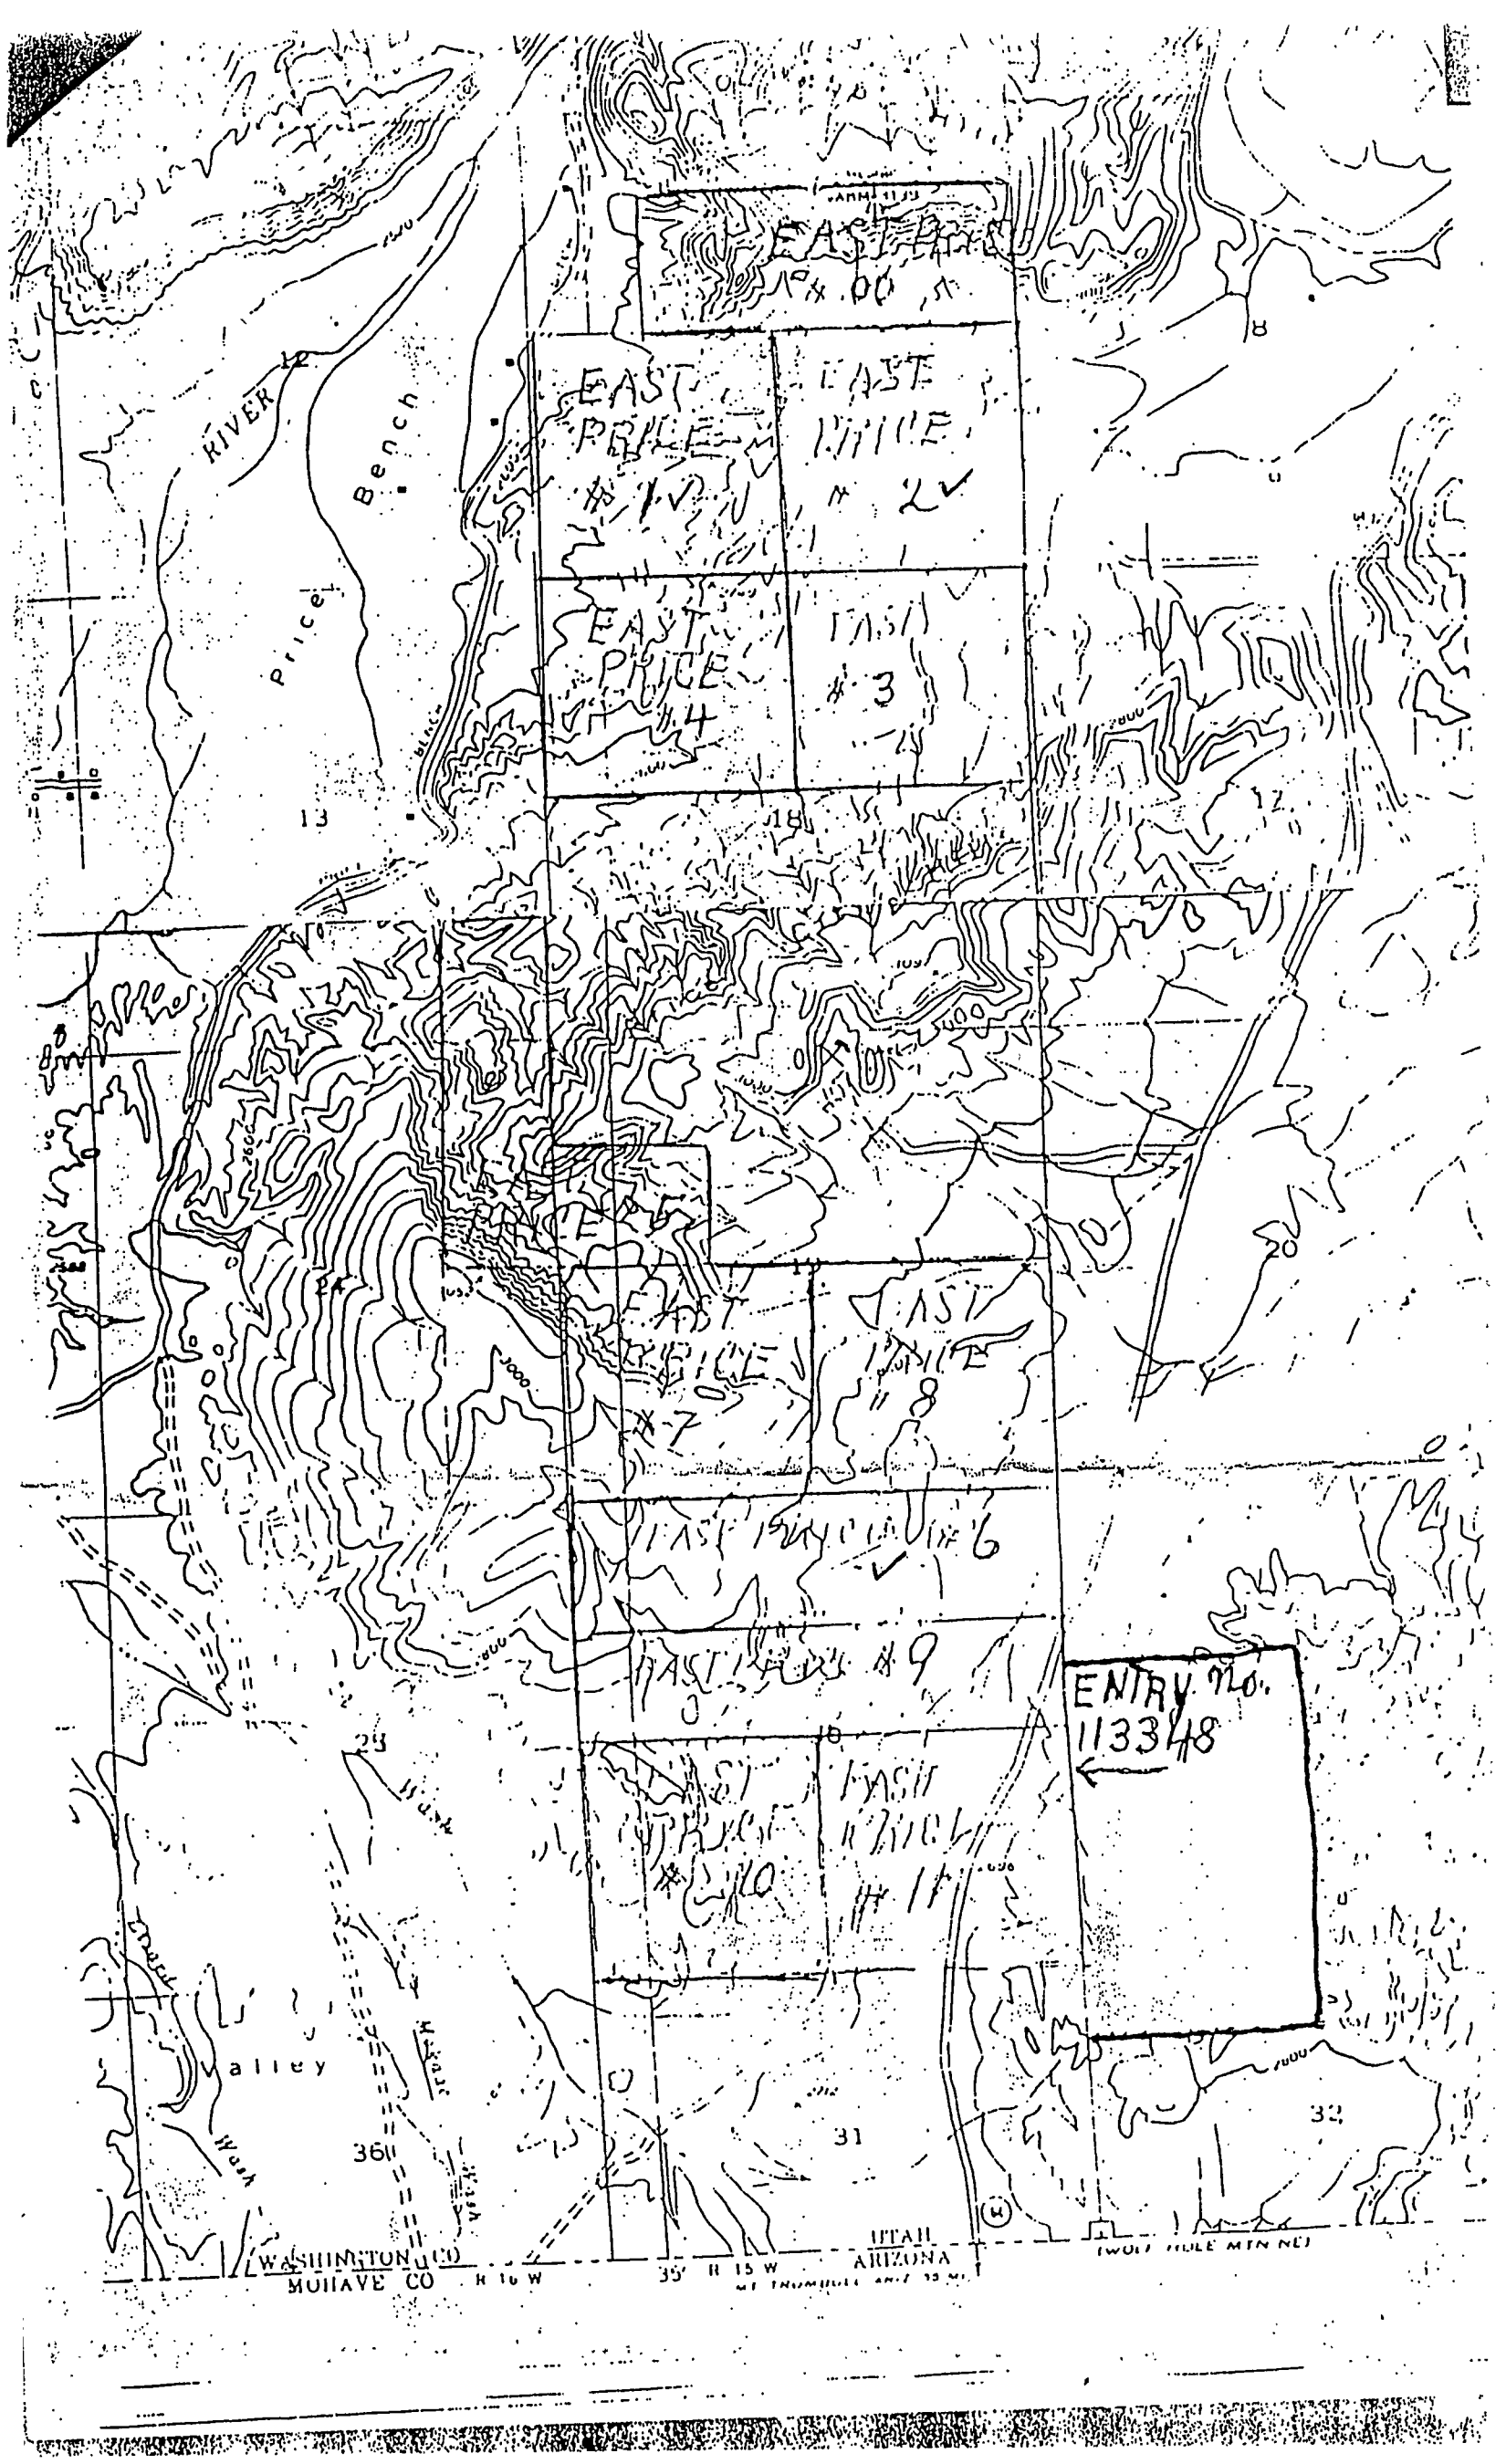

Proposed Completion Date: Claimants intend to complete their assessment work prior to September 1, 1991.

Proposed Reclamation: The claimants are not aware of any action which could reasonably be taken at this point for the purpose of reclaiming any of the areas which have been previously disturbed. No reclamation should be necessitated by an future proposed operations.

I hereby declare that I, or persons I have authorized to do so, will complete all necessary reclamation of areas disturbed during the course of my operations to the standards described in 43 CFR 3809.1-3(d) and that reasonable measures will be taken to prevent unnecessary or undue degradation of the federal lands during operations.

Elton Stout, Claimant/Operator
